Attention: 11th Grade Parents/Guardians:

The State of Missouri requires that all Junior students receive their Meningococcal immunization prior to the start of their Senior year. We are pleased to announce that Johnson County Community Health will be providing a Meningococcal Immunization Clinic at the High School on May 9th, 2019, during school hours. Applications have been sent home with all Junior students for this opportunity. Completed applications must be turned in to the High School Health Office by **April 12th**.

If your student received the Meningococcal immunization prior to their 16th birthday, **they will need a booster shot for their Senior year.**

The Meningococcal immunization must be administered prior to your student attending school in August. Please turn in completed immunization records to the School Nurse.

If you have any questions, or did not receive an application, please contact the High School Health Office:

Lindsay Jewell, BSN, RN – 660-747-2262
Troy Blessing, LPN – 660-747-2262
